- No limit to access points or users: scale your operations based on your current needs.
- **Profiles:** Personal and organisation profiles.
- Different rights levels: owner, admin, user.
- Access types: digital key credential based mobile access, pin-code, RFID, digital key credential based web link, remote access.
- Access limits: full, temporary (date & time, count, or date & time with count).
- Each access is personalised with user phone number or email.
- Extended entry: schedule periods to leave doors unlocked.
- Multiple access sharing.
- Assign address to each access point.
- **Real-time access monitoring:** review specific accesses through filters, or export full data with .csv files.
- Security
  - Data is secured and hosted in EU (AWS).
  - Secured using powerful AES128 encryption.

#### **Enrich your access control** with secure Mobile Keys

Connectivity | Accessibility | Security | Efficiency | Sustainability

### Mobile access

- Digital key credential based personalised access.
- Tap or shake to open.
- Remote access.
- Tap against NFC sticker to automate door opening.

## Pay & Go

• Create offers, charge rent, and share access seamlessly.

## Customisation

- White label: use Smart MasterKey solution with your own branded web and mobile app interfaces.
- **API integration:** integrate our access control functionalities to your own mobile apps with SDK.
- **SDK readiness:** integrate our solution via API endpoints to your IT system for access control process automation.
